casting for industrial production

FV cast was founded as a company Consulting industry in early 2005 and it increasingly consolidates its experience extending its range up to the production stage itself especially in the field of metal casting with production located in the Asian territory. Today it is a good example of CORPORATE PARTNER able to assist its customers in all phases of project's Start-Up: from idea to production reaches the customer's site and then continue throughout the life of the component and each production is tested according to the customer's specifications and guaranteed by our process "ZERO DEFECTS".

OUR STRENGTHS ARE:

- Free design support
- Modelling and prototyping in less than 40 days
- Reduced production time

Production flow, starting from customer's product previously made by sheet

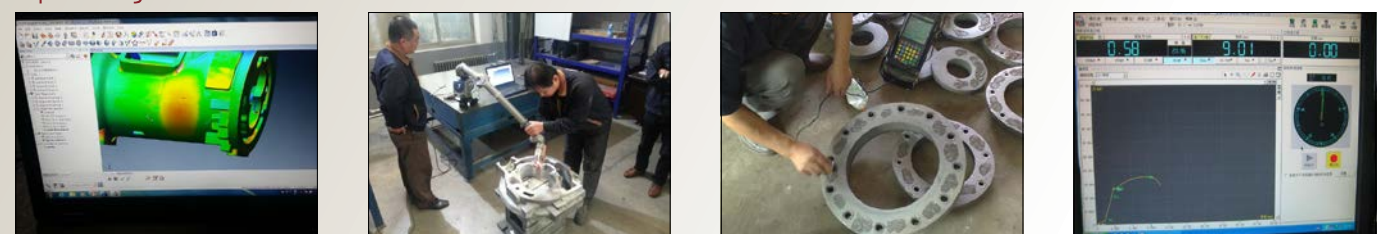

moulds and toolings

foundry and machining

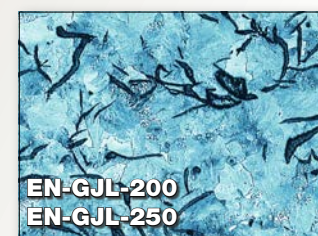

quality and control
