Head of the East-Oriented  
Project Coordination  
Directorate, Gazprom

Sergey Gustov,  
General Director,  
Gazprom LNG  
Saint-Petersburg

Victor Okorokov,  
Technical director,  
Pechora LNG

We would like to express our gratitude to the participants and partners of the 2<sup>nd</sup> international congress “**LNG Congress 2015. Choosing development vector**” organized by [Vostock Capital](#). The event was attended by over **200** government officials and representatives of business and scientific communities. The evident success of the Congress is confirmed by [excellent feedbacks received from our guests](#).

On March 31, the Congress’s **Technology Focus Day** was held to present state-of-the-art technologies and solutions for the construction of large-, mid-, and small-scale LNG plants as well as global solutions aimed at using LNG as gas engine fuel and bunker fuel. Among presenting companies were **WorleyParsons, Siemens, Foster Wheeler, Emerson, Kvaerner, En-**

**trepose Contracting, GE Oil&Gas, SUND Energy AS, Cryomash** and others.

The strategic days of the Congress were devoted to the development and prospects of Russian LNG projects as well as their competitiveness in the global LNG industry. The list of speakers and VIP guests included heads of all the projects being implemented. The Congress was attended by large teams led by CEOs and top executives of operator-companies such as **Gazprom, Sakhalin Energy, Rosneft, Yamal LNG, Arctic LNG, Pechora LNG, and Gazprom LNG St. Petersburg**, as well as officials from LNG consumers such as **GDF SUEZ LNG, National Grid Grain**, and many others.

This year, the programme was considerably expanded through the addition of themes related to the implementation of **small-scale**

**LNG projects**. In the course of round table discussions local government officials, project operators and consultants discussed burning issues related to the use of LNG in the domestic market. Currently LNG is only used by the transport sector and for the gasification of regions located away from the unified gas supply system, i.e. where it competes not with pipeline gas but with more costly types of fuel.

We thank all the participants of the Congress and wish them success and productive work. We are looking forward to our new meeting in 2016 during the Congress, which has already turned into a powerful platform for the Russian and global LNG industry!

*Kind regards,*

*Organising Committee of the Congress*

Full house!

### WHAT OUR DELEGATES SAY

*“Everyone at the Congress 2015 came to the conclusion that LNG has great future ahead.”*

*Channel «Russia 24»*

*It is a very useful and excellent event. It gives you amazing opportunity to meet people I wish I had met before because they have very interesting insights. It is very well organised*

*Steven Kryn, Sakhalin Energy*

*I have really enjoyed staying here today. My colleagues gathered here are exactly the peers to meet and communicate with, so we have made the most of our time today!*

*Sergey Gustov,  
Gazprom LNG, Saint-Petersburg*

*I'm impressed with a very high level of delegations attending the congress, which helps discuss a wide range of issues with true decision-makers.*

*Aleksandr Klimentyev, Deputy Minister of  
Natural Resources and Industrial Policy,  
Government, Zabaikalskiy kray*

*Everything is done remarkably well! It is a useful event, and I'm glad it is becoming a tradition now. It is a good platform.*

*Evgeniy Kot, Yamal LNG*

*LNG Congress Russia is turning into a widely recognized platform for professional exchange of opinions between the market participants.*

*Victor Timoshilov, Gazprom*

### DO NOT MISS OUT ON LNG CONGRESS 2016!
