## RENEXPO® BiH Program Small Hydro Power Conference

09:30 - 09:45	<b>Registration</b>
09:45 - 09:50	Welcome Moderator: Dipl. Ing. Hajrudin Dzafo - JP Elektroprivreda BiH
<b>Block I</b>	<b>Introduction</b>
09:50 - 10:15	<b>Investment opportunities and projects in BiH</b> Speaker: Amir Kazic - FIPA
10:15 - 10:40	<b>The investment framework for SHPP: concession/ licenses/ permits</b> Speaker: Ministry of Energy Mining and Industry
10:40 - 11:05	<b>Hydro-power mapping in BiH - from natural to technical/ economic/ ecological potential</b> Speaker: - DG Near analysis team
<b>Block II</b>	<b>Technologies</b>
11:05 - 11:25	<b>Solution for low head up from 5 to 40 kW</b> Speaker: Maryam Rabla - Andritz Hydro
11:25 - 11:45	<b>Small Hydro Power in the Western Balkans</b> Speaker: Jan Drost - Spaans Babcock bv
11:45 - 12:05	<b>"SMART TURBINE" Solution Western Balkans</b> Speaker: Thomas Sageder - Global Hydro Energy GmbH
12:05 - 12:20	<b>"Experience of building new hydropower plants in Bosnia &amp; Herzegovina – HPP Novakovici, HPP Zapece and HPP Govza"</b> Speaker: Smail Omeragic - GUGLER Water Turbines GmbH/ CJ doo Bihac
<b>Block III</b>	<b>GIZ - Small hydro power sector round table</b>
13:00 - 13:30	<b>Challenges in Small Hydro Power development in BiH - discussion input</b> Speaker: GIZ
13:30 - 15:00	<b>Round table discussion</b>

On behalf of the German government, the **Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ)** supports the creation of framework conditions for the increased use of renewable energy sources in BiH via the project **“Promotion of Renewable Energy in Bosnia and Herzegovina”**. The project is designed in the following four areas of intervention :

- **General framework conditions for renewable energy sector;**
- **Support schemes and community based approaches to finance RE projects;**
- **Sustainable Small Hydro Power sector development;**
- **Development of the bio energy and innovative technologies sector.**

The interventions in the small hydro power component focus on the question how the small hydro power potential can be utilized in a sustainable manner. This includes activities in the fields of optimal technical design and construction of plants, strategic identification of priority sites, keeping the ecological dimension in focus and civil society dialogue on the hydro power development in the country. Capacity development of all relevant stakeholders is integral part of the lines of intervention. On RENEXPO a joint dialogue between all relevant stakeholders on the investment options and detailed analysis of the existing situation in the small hydropower sector in BiH is envisaged.

**Registration Fee per person/per conference**

**FREE OF CHARGE**
