Opening Ceremony

Pierroberto Folgiero
MAIRE TECNIMONT

Keynote speech

Prof. Maria C. Messa, Rettore
UNIVERSITA MILANO-BICOCCA

Keynote speech

Paolo Coletti
TECHINT

Keynote speech

Federico Mazzanti
XSIGHT by SAIPEM

“Informative and exciting daily keynote speeches by renowned experts will shed light on their particular specialist fields. No other congress events will be held during these 30-minute speeches.”

THEME 1

“Out-of-the-box” High Integrity Pressure Protection Systems (HIPPS) for Oil and Gas Wellheads.

Patrick S. Flanders
ATV HIPPS

PC-based control for process automation: products for hazardous areas and integration of relevant interfaces

Giuseppe Lettere
BECKHOFF AUTOMATION

Enel Thermal Generation: advanced control system

Eleonora Porro
ENEL

Analysar Management and Dynamic Quality Measurement

Hans Van Nuenen
KROHNE

E-RTTM - State of the Art Leak and Theft Detection

Daniel Vogt
KROHNE

A chemical plant combines the standards ISA-88 and ISA-95 to achieve maximum flexibility and reduce its new product development time to market gap

Victor E. Bertorelli
MATRIXTI

A Revolutionary Digital Controller

Leonardo Ongetta
ROTORK

Fire and Gas Mapping

David Orr
SAFETY ENG.

Dynamic simulation: a tool for advanced process control strategies and design

Alessandro Guarise
TECHINT

Compressor control systems standardization

Ezio Pasqualon, Luigi Calviello
TECNIMONT / ECTPAC

Post fata resurgo: making the control system revamping being bumpless and starting point for new improvements

Max Veronesi
YOKOGAWA

THEME 2

From supplier to partner for process industries: providing data for the digital era

Nunzio Bonavita
ABB

Cyber-Physical Protection of SCADA and ICS Systems

Luigi Morabito
BECKHOFF AUTOMATION

The future of Industrial IOT : EdgeX Foundry, the open source interoperability framework

Flavio Devide
DELL EMC

Cybersecurity: protect your plant against potential threats

Sanjin Bisevac
EMERSON

IIoT in the instrumentation for process unit

Mario Ragno, Lorenzo della Penna
ENDRESS&HAUSER

The impact of the 'Internet of Things' on privacy, data protection and security

Stefano Ricci
HTLAW

Radio Frequency Identification (RFID) as effective tracking system of goods at site: the experience of IMI ORTON for TengizChevrOil FGP/WPMP project

Fabrizio Delledonne
IMI ORTON

Oil Refinery applies IIoT for Process Control

Cristian Moraes
METSO

Build a More Secure Process Control System - Manage Threats with a Comprehensive Security Approach

Roberto Motta
ROCKWELL

A responsible approach to industrial open Ecosystem

Massimo Manzari, Andrea Rossetti
UNIVERSITÀ MILANO-BICOCCA

Industry 4.0 – The Evolution of Changing Data into Insights. Optimizing of Efficiency and Availability in the Process Industry

John van Leeuwen
WEIDMULLER

Industrial Analytics solution for oil&gas

Josh Ferrara
XSIGHT BY SAIPEM

THEME 3

Analyzers Systems 4.0

Maurizio Simonelli
ABB

Renewable Energy Challenges and Business Opportunities

Kumar Pankaj
AEPC, MoPE

Desalting, Desalters, and salt in crude monitoring in process: an overview

Maurizio Castellano
BAGGI

Exceptionally compact and intrinsically safe: Terminals for explosion protection

Angelo Caputi
BECKHOFF AUTOMATION

VA Meters are ready to meet the latest communication requirements: Foundation Fieldbus

Paolo Rolando
BROOKS INSTRUMENT

Advanced Phase Measurement: designed to reduce process upsets in challenging applications

Giuseppe Iandolo
EMERSON

Corrosion and erosion monitoring system and integrity management perspective

Kiell Wold, Adriana Caba
EMERSON

Instrumentation Reliability: A systematic approach

Ranjan Bhattacharya

Creation of combustion efficiency using Kurz thermal mass flowmeters

Gianantonio Favalessa
ITALCONTROL

New advances in folded pathlength technology for Process Tunable Diode Laser Absorption Spectrometers (TDLAS)

Jean Nicolas Adami
METTLER TOLEDO

Intelligent sonic online flow measurement

H Niknam Pouriya
PIRAMOON SYSTEM QESHM

Advanced gas flow measurements in Oil & Gas and Power Industries

Jack Koeken
PRECISION FLUID CONTROLS

Success in Critical Application for Energy and Power Control Systems

Gianluigi Rossi
SAMSON

The importance of regulations in gas detection

Guido Meraviglia
SENSITRON

ELDS Enhanced Laser Diode Spectroscopy Gas Detection: the new era of laser open path gas detection

Dean Kevin
SOCRATE

New dimensions of explosion protection: How a revolutionary technology helps to make the flameproof encapsulation fit for Process Automation Technologies

Arnhold Thorsten
STAHL

Gas sampling and analysis for process control

Giacomo Ardizio
TELOS

VEGA: A history of developing innovative solutions for the refinery and chemical industries

Vincenzo Penta
VEGA

80GHz technology in process measurement- Experience from the Field

Daniele Romano
VEGA

A more efficient approach to Control Valve Maintenance

Michele Ferrante
VSI CONTROLS
