EXHIBITORS

 **600**
International exhibitors

[CLICK HERE TO VIEW THE EXHIBITOR LIST](#)

Dedicated Hubs and zones on the exhibition floor

- Digitalisation
- Customer Centricity
- Energy Revolution
- Energy Markets
- Initiate!
- EU project zone
- Country Pavilions

Products and services displayed on the exhibition floor include

- Energy efficiency & Energy services
- IT/ ICT utility services
- Smart homes/ End user engagement
- Smart metering solutions
- Gas & Smart water
- T&D operations infrastructure
- Energy Storage
- Cyber Security
- Blockchain
- Storage
- Energy Trading
- Retail
- Initiate!
- Smart Cities
- Intelligent Buildings
- Electric Mobility
- Augmented Reality

VISITOR PROFILE

 **12,000+**
including:

- Utilities
- Retailers
- Commodity Traders
- Renewable Energy Providers
- Large Energy Consumers
- Regulators & Policy Makers
- European Bodies
- Energy Agencies
- Municipalities
- Regions
- ESCOs
- Aggregators
- Consultancies
- Investors & Financial Institutions
- Brokers
- Analysts
- Startups
- Students
- Grid Operators
- Telecoms
- Media
- Solution Providers
- Industrial and Commercial energy consumers
- Independent Power Producers
- Small & Medium Utilities
- Renewables
- Energy trading
- Wholesale energy market

GERMANY COUNTRY FOCUS:

In order to achieve the ambitious energy transformation, set out in the Energiewende, by 2030 half of all electricity supply will come from renewable energy sources; Germany must continue to develop cost-effective market-based approaches which will support the forecasted growth of variable renewable generation. A great reason to showcase the country's strategic and practical solutions to achieving this at EUW 2018.

2 CONTENT-RICH PROGRAMMES

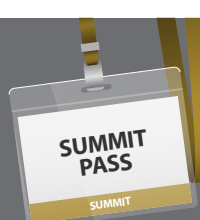

Summit Session Programme

3-day programme highlighting strategic themes causing shifts in the utility business.

Designed with the objectives of our community in mind, this high-level knowledge sharing programme features 3 key themes crucial for businesses striving to achieve a fully integrated and interconnected electricity system.

- **The Low Carbon Energy Programme**, offering a detailed roadmap on transitioning towards a low-carbon future
- **Energy Markets**, showcasing the future of energy trading, price drivers and the market design
- **Digitalisation**, bringing into focus key technologies underpinning the smart energy transition, such as cyber security, artificial intelligence, augmented reality and Blockchain
