

UWT China Expo 2019

Time: September 18-20, 2019

Venue: Shanghai New International Expo Centre (SNIEC)

Theme: Water and Sustainable Development

Focus Makes Quality

UWT (urban water & wastewater treatment) China Expo 2019 will be held in Shanghai New International Expo Centre during September 18-20, 2019 concurrent with “2019 Smart Urban Water Resources Summit and Water Engineering Conference”. with the system of “secondary water supply, smart water, sponge city, municipal pipe network and building water supply & drainage”, UWT China Expo 2019 will introduce the latest information of international water industry, apply recyclable energy, interpret the policy of related industry and analyze the industrial development all over the world. Moreover, UWT China Expo becomes a high-end business platform, which promotes the comprehensive development and utilization of water resources, strengthens the management of drinking water safety and further integrates the development of applying urban water treatment technology. UWT Committee truly expects your participation.

Why UWT China Expo 2019?

- Government policy support and huge potential opportunities in China;
- Organized by authorities in water industry, grand gathering of professionals from the government, water companies, designing institute and engineering companies in one platform;
- A 60,000 m² business platform working for comprehensive solutions of urban water system in China & 70,000 high-quality visitors;
- Participate in more than 20 high-level conferences for in-depth exchange of industry know-how, networking and newest market trends;
- One-stop service from the ideal access to establish and maintain relationships for business transaction;
- Your competitors are here, i.e. Grundfos, KSB, SWAN, Schneider Electric, Saint-Gobain, Viega.

Concurrent Events

The UWT Committee continuously exploits the high-end and professional visitors, and strengthens the communication between exhibitors and buyers. Meanwhile, UWT committee organizes series of conferences, seminars and summits by gathering several professional experts, which includes:

- Smart Urban Water Resources Summit and Water Engineering Conference
- Urban Secondary Water Supply Security Technology Development Conference

- Wisdom Water Summit
- Sponge City Construction Seminar
- Urban Comprehensive Utility Tunnel Engineering and Management Conference
- Int'l Building Water Supply&Drainage Industry Development Forum

UWT China 2018 Review

The three days of UWT China 2018, the 8th International Trade Fair for urban water and wastewater treatment, between September 3-5, were another resounding success at the Shanghai New International Expo Centre (SNIEC). The Expo was jointly organized by National Engineering Research Center of Urban Water Resources, Plumbing Facilities Committee of China Construction Metal Structure Association, the Architectural Society of China Water Supply and Wastewater Association, Plastics Piping Committee of China Plastics Processing Industry Association and Shanghai Zhanye Exhibition Co.,Ltd, and received supports from Water Supply and Drainage Technology Information Network in East China, Shanghai Water Supply Industry Association, Shanghai Drainage Industry Association, Shanghai Solar Energy Society, Zhejiang Water Supply and Drainage Society and several related societies, associations, design institutes and cooperative media.

The show areas of this year reached 60,000 square meters. The expo lasted for three days, which attracted amounts of enterprises from 29 countries and 11,803 professional visitors. Among these attendees, there were 1264 professional buyers from Hongkong, Macao and Taiwan, which increased by 23%. The exhibitors and visitors appraised that the expo possessed a strong sense of pertinence and professionalism. After six years, the success of this year further established its leading position in the industry of urban water supply and drainage.

Exhibit Profile

- Municipal Pipe Network
- Wastewater Treatment System
- Urban Water Supply and Drainage System
- Wisdom Water System
- Sponge City
- Building Water Supply and Drainage System
- Pool/Spa/Patio System

Visitor Profile

- Government Management Office
- Municipal/Architecture Design Institutes
- Water Supply Companies & Water Affairs Groups
- Water Treatment Engineering Company/Building Engineering Company
- Sewage Treatment Factory
- Real Estate Developers/Property Management Company

- Agent Distributors/Traders
- Scientific Research and Design Institute/Business Consulting Company
- Professional Colleges and Universities

Organizer:

National Engineer Research Center (south) of Urban Water Resources;
Plumbing Facilities Committee of China Construction Metal Structure Association;
The Architectural Society of China Water Supply and Wastewater Association;
China Plastics Piping Association;
Shanghai Zhanye Exhibition Co., Ltd.

Supporter:

East China Water Supply&Drainage Technical Information Network;
Australia Rainwater Harvesting Association;
Key Laboratory of Urban Stormwater System and Water Environment, Ministry of Education;
Shanghai Water Supply Trade Association;
Shanghai Water Reclamation Trade Association;
Waterscape Fountain Committee of China Construction Metal Structure Association;
Hongkong Water Supply&Drainage Institute;
Hongkong Licensed Professional Water Institute;
Water Supply&Drainage Committee of JiangSu Provincial Civil Engineering&Architectural Society;
Water Supply&Drainage Committee of Zhejiang Provincial Trade Association of Survey and Design.
